Summary

This enthusiastic data science intern has a solid background in machine learning and NLP. Exposure to state-of-the-art AI applications such as chatbot programs or summarization tools underlines his capabilities as a team player and his effective project management skills.

Skills

- Machine learning
- Natural language processing
- Project management
- Langchain
- Deep Learning
- PyTorch
- Optuna Framework
- React
- SQL
- MongoDB
- FastAPI development
- Data analysis
- TensorFlow
- Streamlit
- Python
- RAG

Experience

Kartiken Sharma
Intern at Zintellix
dehradun, India

June 2025 to July 2025

- During my two-month internship at Zintellix as a Data Science Intern, I worked on real-world AI applications that involved machine learning, natural language processing, and Generative AI. I built and deployed backend systems using FastAPI. I also developed tools such as a YouTube transcript summarizer and a chatbot using LangChain. This experience helped me gain practical skills with PyTorch, Docker, and RAG-based architectures. My internship offered valuable exposure to useful tools, teamwork in a remote setting, and the complete development process of AI solutions.

Kartiken Sharma
Intern at Youth Warrior
Dehradun, India

June 2023 to July 2023

- During my social internship, I participate in activities that aim to create a positive impact. I am committed to raising awareness of important social issues through advocacy and social media campaigns. I also focus on building community. To educate people and encourage change, I take part in group discussions to share ideas. I listen to different perspectives and work together to find solutions to the problems communities face. We identified key challenges and looked for steps we can take to create effective strategies to address these issues. We should develop teamwork and problem-solving skills through these sessions

Education and Training

Jim Pioneer School
Secondary School
Pitambarpur, Shahpur, Dehradun, Uttarakhand

Jim Pioneer School
High School Diploma
Pitambarpur, Shahpur, Dehradun, Uttarakhand

UPES
Bachelor of Technology (CSE): Computer Science And Engineering
Bidholi, Dehradun, Uttarakhand

Projects

- **ASL (American Sign Language) Recognition App** – Python (OpenCV + MediaPipe) backend, React
- **YouTube Transcript Q&A Tool** – Fetches transcripts from YouTube videos, processes them, and allows users to ask questions about the content using an AI model.
- **Chatbot** – Built using LangChain (and sometimes Hugging Face models) to carry out general conversation
- **Insurance Premium Predictor** – ML model to estimate insurance premiums based on customer details, deployed with FastAPI for API-based access.
- **Competitive AI** – AI-powered tool that gathers business information about a company and generates a CSV report for competitive analysis.
